Self Adhesive Joint Tape

Sheet No: PD543FR
Issued: Oct 2024
Pages: 1 of 1

Description

Polyamide knitted reinforcement for use with the Caltech range of cold liquid applied roofing membranes which, unlike conventional scrims, is readily capable of stretching within the membrane to accommodate a high degree of thermal and structural movement.

Use

Caltech Reinforcement Tape is encapsulated by the Caltech cold applied liquid membranes to impart additional tensile strength and durability. It is used over joints or cracks liable to movement and for bridging gaps between substrates. Caltech Reinforcement Tape follows surface contours and may easily be moulded over complex detail work, and can also be used in the construction of expansion joints.

Application

Where necessary, materials should be cut with a knife or scissors. Apply a full coat of the Caltech liquid applied product as required, approximately 33% wider than the tape.

Storage and Transport

Store in original packaging in a location away from sources of heat or ignition, dampness and extremes of temperature. Keep protected from rain and sunlight.

Product Data

Roll size	50m x 150mm
Colour	White
Shelf life	Use within 12 months of purchase

Health & Safety

Safety Data Sheets are available upon request and can also be downloaded directly from www.alumascroofing.com.
