

FLAT TO PITCH CONVERSIONS

ALUMASC
ROOFING

Flat Roof to Pitched Roof Conversions

A bespoke engineered flat to pitch conversion and over roofing system, designed to eradicate poorly designed or failed roofs.

Using high grade, lightweight, cold rolled British steel, our design team can bring new life to any building as well as solving poor rainwater management by creating new external gutters and downpipes.

Our expert design team are on hand to advise and provide a cost effective long-term solution to suit our clients budgets and requirements.

Advantages

- 50 Year warranty
- 60+ Year life expectancy
- Maintenance free
- Lower heating costs
- 0.13 U-value
- Increased asset value
- Lower building insurance

Alumasc can assist with

- ✓ Budget quotations
- ✓ Design & drawings
- ✓ Planning
- ✓ Building regulations
- ✓ Structural calculations
