

# METSHIELD METAL ROOF SYSTEMS

## MS-OVCL-R2 - OVERCLAD SYSTEM

Metshield is a range of profile metal sheets and composite panel solutions for a wide range of applications, with a comprehensive range of accessories and complementary products. Outer weatherproofing sheets are manufactured with a high-performance coated steel for aesthetics and durability. Alumasc's Twin & Single Skin Profiled Sheeting range is suitable for a wide range of buildings and situations, including warehousing and industrial buildings. The Metshield system includes a range of spacers, fixings, sealants, flashings, and rooflights.

	System Options
5	Metshield Single Skin Roof 0.7mm thick galvanised and painted finish sheet
4	Metshield Quilt Insulation Quilted insulation roll installed over base sheet
3	Metshield Bar Connected to brackets to allow the sheets to be fixed
2	Metshield Bracket Steel brackets fixed at specified centres
1	Existing Roof Structure Structurally suitable to take the system (VCL required over existing roof)

### Key Benefits

- Improves the building's energy efficiency in summer and winter
- Acoustic Enhancement
- Various Colours and Profiles
- Quick and easy install
- Hard wearing
- Suitable for pitched roofs down to 5 degrees
- Lightweight solution
- Low maintenance
- Weather resistant

### ✓ Coating & Coating Guarantee - Ultra 60

For over twenty years ArcelorMittal has been at the forefront of applying weather resistant coatings to high quality steel coils. Granite®HDX is the high quality Thermoset Paint applied to give our range of Ultra 60 coated products their performance guarantee, when used in an external building envelope application, namely roof and vertical panels on industrial and commercial buildings.

Guarantees can be up to and including 30 Years on the sheet finishes depending on the external environment and geographical location.
