

METSHIELD METAL WALL SYSTEMS

MS-RW-PIR-W4 - COMPOSITE SYSTEM

Metshield is a range of profile metal sheets and composite panel solutions for a wide range of applications, with a comprehensive range of accessories and complementary products. Outer weatherproofing sheets are manufactured with a high-performance coated steel for aesthetics and durability. Alumasc's Twin & Single Skin Profiled Sheeting range is suitable for a wide range of buildings and situations, including warehousing and industrial buildings. The Metshield system includes a range of spacers, fixings, sealants, flashings, and rooflights.

	System Options
3	Metshield Lightly Profiled 0.4mm thick galvanised and painted inner sheet
2	Metshield PIR Insulation PIR Foam Core bonded to steel sheets
1	Metshield Trapezoidal Style Profile 0.6mm thick galvanised and painted finish sheet

Note: Available profiles are Liner, Micro-rib and Smooth (please contact Alumasc for more information)

Key Benefits

- Improves the building's energy efficiency in summer and winter
- Acoustic Enhancement
- Various Colours and Profiles
- Quick and easy install
- Hard wearing
- Lightweight solution
- Low maintenance
- Weather resistant
- Solar Compatible

Sustainability By Design!

Coating & Coating Guarantee - Ultra 60

For over twenty years ArcelorMittal has been at the forefront of applying weather resistant coatings to high quality steel coils. Granite®HDX is the high quality Thermoset Paint applied to give our range of Ultra 60 coated products their performance guarantee, when used in an external building envelope application, namely roof and vertical panels on industrial and commercial buildings.

Guarantees can be up to and including 30 Years on the sheet finishes depending on the external environment and geographical location.
