

Description

Alumasc Separation Fleece is a non-woven glass fibre geotextile for use as a protection and separation layer. The material provides physical protection to adjacent components and facilitates compatibility separation where required.

Application

Side and end laps shall be formed with a minimum overlap of 100mm. The fleece is generally installed loose-laid; however, additional mechanical fixing may be required where the product is installed on vertical or inclined surfaces.

Product Data

Length	100m
Width	2m
Colour	White
Mass	120 (g/m ²)
Thickness	1.25mm
Roll Weight	24kgs

Fire Performance

Reaction to Fire: Class B in accordance with EN 13501-1.

Storage

Store horizontally in the original packaging, in a clean, dry location, away from heat sources.
